

Progress report of KaVA AGN Science WG

Motoki Kino (Kogakuin Univ), Kazuhiro Hada (NAOJ)
on behalf of KaVA-EAVN AGN Science WG

Contents

1. Members: from KaVA to EAVN
2. Progress of KaVA Large Program
3. EAVN and EHT campaign in 2017
4. Plan in 2018

**From KaVA to EAVN:
the case of KaVA AGN SWG**

Kick off at Guiyang, China!

Chinese members in the AGN SWG (2017 Nov)

Zhiqiang Shen (SHAO)

Wu Jiang (SHAO)

Tao An (SHAO)

Lang Cui (XAO)

Yingkang Zhang (SHAO)

Xiaopeng Cheng (SHAO)

Yuzhu Cui (NAOJ)

Guang-Yao Zhao (KASI)

KaVA AGN SWG - making a smooth transition to EAVN AGN SWG

nationality of participants (2017 Oct)

Memo of KaVA/EAVN AGN Regular Skype meet.

Date: 2017 October 26th (Thu) KST/JST 14:00 - 16:00,
CST 13:00 - 15:00

Attendees(16)

NAOJ Mtk (1) : M. Kino

KASI (5) : K. Wajima, I. Cho, J.C. Algaba, G.Y. Zhao, B.W. Sohn

SNU (2) : S. Trippe, J.H. Park

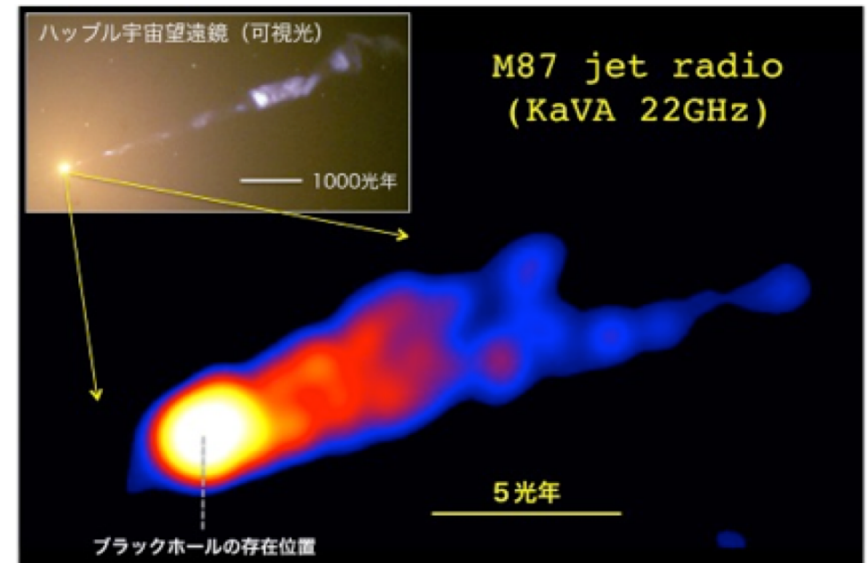

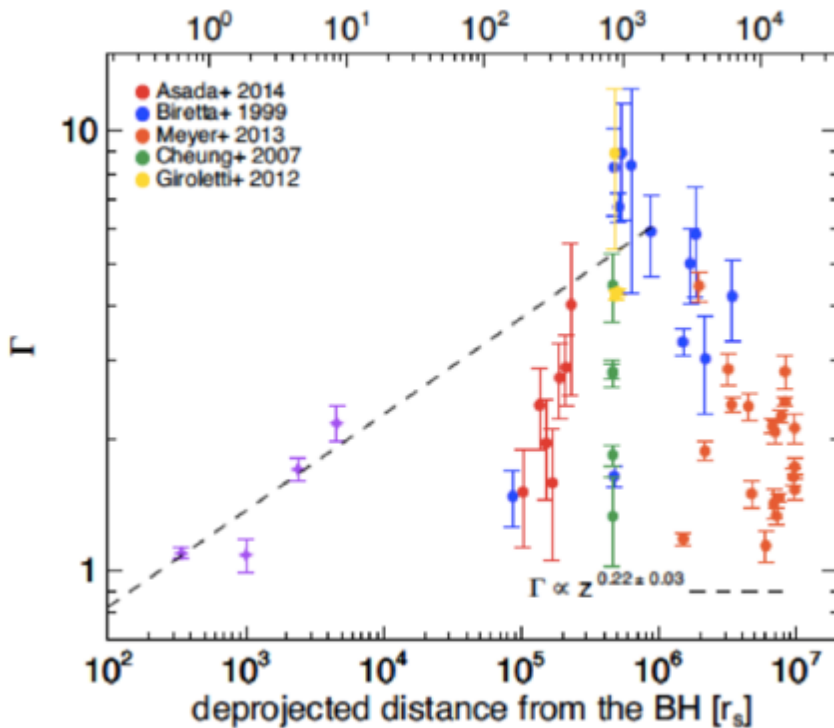

Yonsei (1) : H.W. Ro

NAOJ Miz (3) : K. Hada, F. Tazaki, Y-Z Cui

SHAO(4) : W. Jiang, T. An, Y. Zhang, X. Cheng

Progress of KaVA AGN Large Program

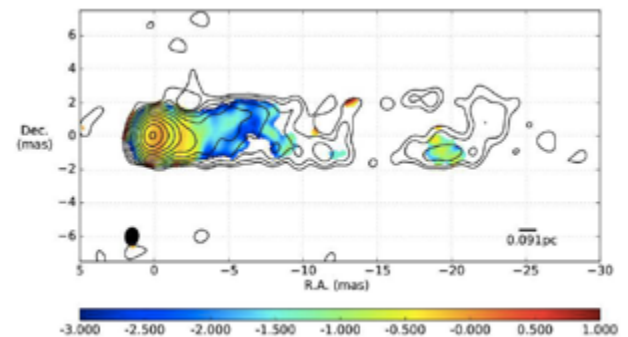

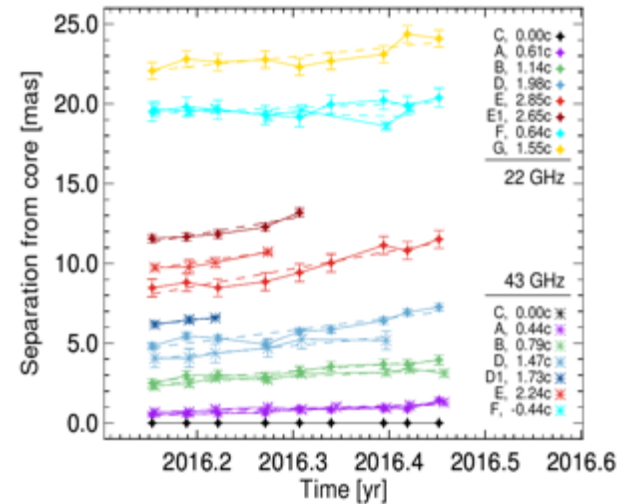

Our pilot KaVA observations revealed superluminal motions in M87

Hada, Park, KaVA AGN SWG et al. (2017), PASJ

Current status of KaVA AGN LP for M87

- KaVA AGN LP is the only one VLBI monitoring for M87!
- Bi-weekly monitoring reveals velocity field in great details!
(Park et al. *in prep*)
- Quasi simultaneous 22/43GHz enables us to explore spectral index! (Ro et al. *in prep*)

Current status of KaVA AGN LP for Sgr A*

- Indeed, the KaVA data quality is very good because of rich short baselines!
- The PI, GY Zhao (KASI), is wrapping up Sgr A* data in 2014-2015.
- Michael Johnson (Harvard) joins us and supports closure-only analysis.

More results to come

See details in presentations in recent workshops

Workshop "Challenges of AGN Jets"
National Astronomical Observatory of Japan (NAOJ), Mitaka, Tokyo

Schedule
2017 Jan 17 (Tue): Joint-session "Introduction to black hole shadow" @Lecture room at the Main building
Jan 18 (Wed) – 20 (Fri): The workshop "Challenges of AGN jets" @Large seminar room at the SUBARU building

Topics

- Jet Fundamental
- Pursuit of Accretion Flows and Circumnuclear Medium
- New Radio Surveys

Joint-session Lecturers:
Fu H-Y. (ASIAA) "Introduction to BH shadow: related physics and challenges"
Aoyama K. (MIT) "Introduction to BH shadow imaging"

Keynote Speakers:
Ohira, Y. (Aoyama Gakuin U.) "Particle acceleration, Dissipation"
Kino, M. (KASIR/NAOJ) "Jet energetics"
Toma, K. (Tohoku U.) "Jet dynamics"

Invited Speakers:
Asada K. (ASIAN), Hada K. (NAOJ), Hayashida M. (U Tokyo),
Horiya M. (NAOJ), Jura T. (KASI), Kawashima T. (NAOJ),
Nagai H. (NAOJ), Nakamura M. (ASIAA), Ninuma K. (Yamaguchi U.),
Park J-H. (Seoul Nat'l U.), Wada K. (KASI), Zhao G-Y. (KASI)

Organizing Committee:
Kino, M. (KASIR/NAOJ), chair; Hada, K. (NAOJ),
Tajiri, F. (NAOJ), Kawashima, T. (NAOJ),
Nakuma, K. (Yamaguchi U.), Komori, A. (NAOJ, secretary)

A diagram showing a central black hole with accretion disks and jets. A map of Japan is overlaid on the diagram, indicating the location of the workshop.

East Asia To Italy: Nearly Global VLBI Workshop 2017

Eating VLBI Workshop 2017, Jeju, Korea
October 30 - November 1 (Mon-Wed), 2017
Hotel Barons, Seogwipo-si, Jeju, Korea

A map of East Asia showing VLBI stations. The map includes Japan, Korea, and parts of China. A color-coded overlay indicates the sensitivity or coverage of the VLBI network. A small inset shows a radio interferometry fringe pattern.

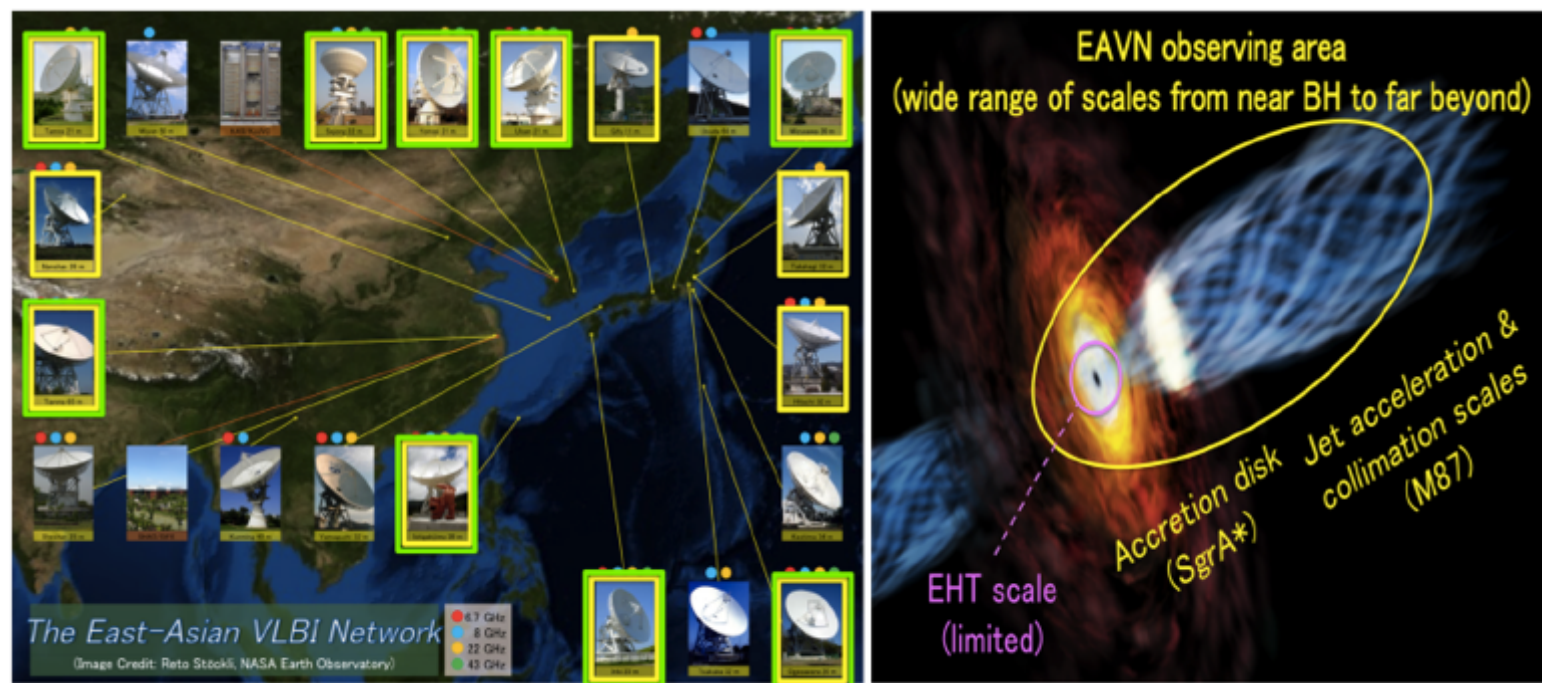

EAVN and EHT campaign in 2017

Demonstrating the Power of EAVN: Coordinated EAVN campaign for M87/SgrA* in 2017 March/April

Hada, K. (NAOJ) on behalf of The EAVN Tiger Team & The EAVN AGN Science Working Group

2 EAVN and EHT joint campaign for M87/SgrA* in April 2017

In the forthcoming April, there will be a special event for the community of black hole physics and high-energy astrophysics: for the first time, ALMA will join the global VLBI network at millimeter wavelengths, so-called the Event Horizon Telescope (EHT). With the EHT plus ALMA, it is expected that images of the shadows of the supermassive black holes in the Galactic Center SgrA* and a nearby radio galaxy M87 are directly obtained, as well as horizon-scale structures of the surrounding accretion disk (SgrA*) and

Plan in 2018

Large Program in 2nd term submitted

In-depth study of plasma flows around super-massive black holes: Intensive monitoring of M87 and Sagittarius A*

Motoki Kino & Bong-Won Sohn

*on behalf of KaVA-EAVN AGN Science Working Group**

Abstract

Exploring the vicinity of super-massive black holes (SMBHs) is one of the frontiers in astrophysics. Because of the largeness of angular-sizes of the central SMBHs, Sagittarius A* (Sgr A*) is the excellent laboratory for studying gas accretion process onto the SMBH and M87 is well known as the best case for investigating plasma outflow ultimately driven by SMBH. To get better understanding of plasma inflow/outflow physics near the SMBHs, we have started this KaVA AGN Large Program (LP). Based on the successful first term of our AGN LP, we propose to continue the same dual frequency (22 and 43 GHz) and high cadence monitoring during the same yearly period as in the 1st term aiming for in-depth studies of our new accomplishments on M87 and Sgr A* obtained in the 1st term. We also emphasize that this AGN LP now plays a leading role for boosting the performance evaluation of the East Asian VLBI Network (EAVN). In order to maximize our scientific accomplishment in the 2nd term, we also enhance a scientific collaboration with Event Horizon Telescope (EHT) Collaboration (EHT-C) via multi-wavelength (MWL) Science Working Group in EHT-C.

Plan of KaVA-EAVN LP w/ EHT (2018)

	total epoch	Interval	when (duration)	1 epoch [hrs]	total [hrs]
M87 @22GHz	12-3 = 9 epochs	2 weeks	2017 Dec – 2018 May (6 months)	7	63
M87 @43GHz	12-3 = 9 epochs	2 weeks	2017 Dec – 2018 May (6 months)	7	63
Sgr A* @43GHz	9 epochs	1 month	all year long	6	54
EHT campaign (M87+SgrA*) @43GHz	3+2 epochs	~ 1 week or even less	2018 Apr (one month)	12	60
EHT campaign (M87+Sgr A*) @22GHz	3 epochs	~ 1-2 weeks	2018 Apr (one month)	12	36

Also plans to request Tianma, Urumqi, JVN, Sejong and Italy

KaVA performance evaluation

- AGN SWG is responsible for
 - C2 mode (1Gbps, 128MHz x 2 IF)
 - 2017: Q-band evaluation completed, open for 2018A
 - 2018: K-band evaluation
 - 2Gbps mode
 - 2017: first test observations at K/Q, various issues found
 - 2018: more analysis (various recorders, correlators)
 - Dual polarization mode
 - 2018: test at K/Q including more VERA stations?

Summary

- KaVA AGN SWG are successfully making a smooth transition to EAVN AGN SWG.
- The 1st paper on early science result on M87 w/ KaVA is published (Hada, AGN SWG+17). More results to come.
- In Spring 2017, the KaVA Large Program successfully coincided with EHT. Also, this LP expanded into the “EAVN campagin”
- AGN SWG are leading KaVA+Tianma array performance evaluation by using the EAVN campaign data. Also contributing to various KaVA performance evaluation items.
- Large Program in 2nd term. More tie-up with EAVN, EHT

Towards EAVN common-use (1/2)

Draft Plan for EAVN Common-Use

(Note that this is a DRAFT plan and details will be discussed at the EAVN meeting in July)

- Start of operation: 2018B semester
 - Shared-risk operation
 - Launch of KaVA+Tianma is prioritized for EAVN common-use
- Total observing time: 100 hours/semester (= 40% of KaVA common-use operation)
- Observation frequency: 22, 43 GHz (and 6.7 GHz if performance evaluation is fully done)
- Observation mode: 1 Gbps (C4 (32 MHz x 8 ch) and/or C5 (16 MHz x 16 ch)), single polarization
- Correlator: Daejeon Hardware Correlator

Blue: approved by KaVA DM

Black: TBD

Underline: related to EAVN TT

Towards EAVN common-use (2/2)

Draft Plan for EAVN Common-Use

(Note that this is a DRAFT plan and details will be discussed at the EAVN meeting in July)

- User support
 - Keeping KaVA's user support structure
 - Inviting new member(s) from China
- Array operation
 - TBD
- Performance evaluation
 - EAVN TT will lead basic modes for common-use observations
- Proposal reviewing
 - TBD

Blue: approved by KaVA DM
Black: TBD
Underline: related to EAVN TT
